

# The Core Concepts of Physiology

Published on behalf of The American Physiological Society  
by Springer

This book is published on behalf of the American Physiological Society (APS) by Springer. Access to APS books published with Springer is free to APS members.

APS publishes three book series in partnership with Springer: *Physiology in Health and Disease* (formerly *Clinical Physiology*), *Methods in Physiology*, and *Perspectives in Physiology* (formerly *People and Ideas*), as well as general titles.

Joel Michael • William Cliff • Jenny McFarland •  
Harold Modell • Ann Wright

# The Core Concepts of Physiology

A New Paradigm for Teaching Physiology

Joel Michael  
Rush Medical College  
Chicago, Illinois  
USA

William Cliff  
Niagara University  
Lewiston, New York  
USA

Jenny McFarland  
Edmonds Community College  
Lynnwood, Washington  
USA

Harold Modell  
Physiology Educational Research Consortium  
Seattle, Washington  
USA

Ann Wright (deceased)  
Formerly at Canisius College  
Buffalo, New York  
USA

ISBN 978-1-4939-6907-4

ISBN 978-1-4939-6909-8 (eBook)

DOI 10.1007/978-1-4939-6909-8

*This book is dedicated to Ann Wright (1952–2016), a dear friend and colleague for many years. Ann contributed in many different ways to the conceptual assessment project from which this book arose. She was always quick to lend a hand when something needed to be done. With her typical positive attitude, she was always certain that we could overcome whatever the current problem was. She made significant contributions to the writing of this book. We will miss her friendship and her professional contributions.*

Joel Michael

Jenny McFarland  
Harold Modell

# Acknowledgements

Much of the work done by the CAB group and described in this book was supported by National Science Foundation Grant DUE-1043443.

Mary Pat Wenderoth, PhD, Department of Biology, University of Washington, Seattle, WA, was a collaborator on our NSF funded project and made many important contributions to this project. Her insights and suggestions appear throughout this book. Patricia Martinkova, PhD, Institute of Computer Science, The Czech Academy of Sciences, Prague, Czech Republic, has been of great assistance in helping us make sense of the data we have collected from our studies with faculty and students.

Finally, we must acknowledge our many colleagues all over the United States and in Europe and Canada who participated in the many surveys that have been reported in our publications. Without their thoughtful input, our development of the core concepts of physiology would have remained idiosyncratic.

# Contents

## Part I Introduction

<b>1</b>	<b>Reforming Science Education/Reforming Physiology Education . . .</b>	<b>3</b>
1.1	The Need for Reform of American Science Education . . . . .	4
1.1.1	Calls for Reform in the 1980s and 1990s . . . . .	4
1.1.2	More Recent Calls for Reform . . . . .	4
1.1.3	Common Features of Reform Documents . . . . .	5
1.1.4	Reforming Both Content and Pedagogy . . . . .	5
1.1.5	The Need for Reform and the Knowledge Explosion . . .	6
1.2	The Need for Reform of Physiology Education . . . . .	8
1.2.1	Physiology Is Hard for Students to Learn . . . . .	8
1.2.2	The Knowledge Explosion and Its Impact on Physiology Teaching and Learning . . . . .	9
1.2.3	The Spectrum of Students Taking Physiology . . . . .	9
1.3	How Should We Attempt to Institute Reform in Physiology Education? . . . . .	11
1.4	What Do We Mean by “Core Concepts?” . . . . .	11
1.4.1	Definitions from Psychology and Philosophy . . . . .	11
1.4.2	Definitions in the Field of Education . . . . .	12
1.4.3	Core Concepts and General Models in Physiology Education . . . . .	13
1.5	Defining the Core Concepts of Biology: The Conceptual Assessment in Biology (CAB) Workshops . . . . .	13
1.6	What Are the Core Concepts of Physiology and How Should They Be Used to Teach Physiology? . . . . .	14

- 1.7 How Can a Focus on Core Concepts Help? . . . . . 15
  - 1.7.1 Selectively Reduce the Body of Knowledge to be Acquired . . . . . 16
  - 1.7.2 Focus on the Generalities and that Which Is Most Transferable . . . . . 16
  - 1.7.3 Provide the Scaffolding for Learning New Things Later . . . . . 16
- 1.8 Organization of this Book . . . . . 17
- References . . . . . 17
- 2 What Is the New Paradigm and What Is New About It? . . . . . 19**
  - 2.1 Thomas Kuhn and the Meaning of a “Paradigm” . . . . . 19
    - 2.1.1 What Did Kuhn Mean by the Term “Paradigm?” . . . . . 20
    - 2.1.2 How and Why Have We Used the Term “Paradigm” in a Book About Physiology Education? . . . . . 20
  - 2.2 The Current Paradigm Shift Underway in Physiology Education . . . . . 21
  - 2.3 The Concept-Based Paradigm . . . . . 22
  - 2.4 Implementing the New Paradigm in Physiology Courses . . . . . 23
  - 2.5 Implementing the New Paradigm in the Curriculum . . . . . 23
  - References . . . . . 24

**Part II The Core Concepts of Physiology**

- 3 What Are the Core Concepts of Physiology? . . . . . 27**
  - 3.1 The Process by Which We Defined the Core Concepts of Physiology . . . . . 27
    - 3.1.1 The Core Concepts of Biology Defined at the First CAB Meeting . . . . . 28
    - 3.1.2 The Core Concepts of Physiology Derived from the Biology Concepts . . . . . 28
    - 3.1.3 Polling our Colleagues for Their Idea About Core Concepts . . . . . 29
  - 3.2 The Core Concepts of Physiology . . . . . 30
    - 3.2.1 The 15 Core Concepts of Physiology and a Brief Explanation of Each . . . . . 30
    - 3.2.2 Faculty Feedback About the 15 Core Concepts . . . . . 32
  - 3.3 Characteristics of the Core Concepts . . . . . 33
    - 3.3.1 The Nature of the Core Concepts . . . . . 33
    - 3.3.2 The Intersecting Nature of the Core Concepts . . . . . 34
  - 3.4 Core Concepts and General Models . . . . . 34
  - 3.5 What Can You Do with the Core Concepts? . . . . . 35
  - 3.6 Organization of the Next Four Chapters . . . . . 35
  - References . . . . . 35

- 4 **What Does It Mean to “Unpack” a Core Concept?** . . . . . 37
  - 4.1 What Does It Mean to “Unpack” a Core Concept? . . . . . 37
    - 4.1.1 Conceptual Assessment and Conceptual Frameworks in Biology . . . . . 38
    - 4.1.2 Hierarchical Levels of Our Conceptual Frameworks . . . . . 39
    - 4.1.3 Conceptual Frameworks and Physiological (Causal) Models . . . . . 40
  - 4.2 How Did We Construct and Validate a Conceptual Framework? . . . . . 40
  - 4.3 Why the Particular Three Core Concepts We Unpacked? . . . . . 41
  - 4.4 What Are the Uses of Conceptual Frameworks? . . . . . 42
    - 4.4.1 Student Learning of Physiology . . . . . 42
    - 4.4.2 Teaching Physiology . . . . . 43
    - 4.4.3 Assessment . . . . . 43
    - 4.4.4 Curriculum Design . . . . . 43
  - References . . . . . 43
- 5 **The “Unpacked” Core Concept of *Homeostasis*** . . . . . 45
  - 5.1 A Conceptual Framework for *Homeostasis* . . . . . 45
  - 5.2 A Visual Representation of the Core Concept of *Homeostasis* . . . . . 47
  - 5.3 ***Homeostasis*: Terminology** . . . . . 47
  - 5.4 Where Is the Core Concept of *Homeostasis* Applicable? . . . . . 50
  - 5.5 Topics that Cause Confusion for Students and Instructors: Sticky Points . . . . . 51
    - 5.5.1 Everything Is Regulated . . . . . 52
    - 5.5.2 Homeostasis Is an ON/OFF Switch . . . . . 52
    - 5.5.3 How Constant Is “Relatively Constant?” . . . . . 52
    - 5.5.4 The Set Point Can Change . . . . . 53
    - 5.5.5 Not All Examples of Negative Feedback Are Homeostatic . . . . . 53
    - 5.5.6 The Hierarchy of Homeostatic Regulation . . . . . 53
  - 5.6 Summing Up: *Homeostasis* . . . . . 54
  - References . . . . . 54
- 6 **The “Unpacked” Core Concept of *Flow Down Gradients*** . . . . . 55
  - 6.1 The Conceptual Framework for *Flow Down Gradient* . . . . . 55
  - 6.2 ***Flow Down Gradients*: Terminology** . . . . . 55
  - 6.3 A Visual Representation of the Core Concept of *Flow Down Gradients* . . . . . 56
  - 6.4 In What Physiological Systems Does *Flow Down Gradients* Apply? . . . . . 58
  - 6.5 Topics that Cause Confusion for Students and Instructors: Sticky Points . . . . . 58
    - 6.5.1 Problems with *Flow Down Gradients* in the Circulation . . . . . 59

- 6.5.2 Failure to Take into Account the Presence of Multiple Gradients . . . . . 59
- 6.5.3 Recognizing Osmosis as an Example of a Core Concept . . . . . 60
- 6.5.4 Molecules Diffuse Independently of One Another . . . . 60
- 6.5.5 The Presence of a Gradient Does Not Mean that Flow Will Occur . . . . . 60
- 6.6 Summing Up: *Flow Down Gradients* . . . . . 60
- References . . . . . 61
- 7 The “Unpacked” Core Concept of *Cell–Cell Communication* . . . . . 63**
  - 7.1 A Conceptual Framework for *Cell–Cell Communication* . . . . . 63
  - 7.2 A Visual Representation of the Core Concept of *Cell–Cell Communication* . . . . . 66
  - 7.3 *Cell–Cell Communication*: Terminology . . . . . 67
  - 7.4 Where Is *Cell–Cell Communication* Applicable? . . . . . 67
  - 7.5 Topics that Cause Confusion for Students and Instructors: Sticky Points . . . . . 69
    - 7.5.1 What Is Information? . . . . . 69
    - 7.5.2 The Central Role of Enzymes . . . . . 69
    - 7.5.3 What Is a Response? . . . . . 70
    - 7.5.4 Properties of Receptors . . . . . 70
    - 7.5.5 The Number of Receptors on a Target Cell Is Small (1 to Few) . . . . . 71
    - 7.5.6 The Response to a Messenger Is a Property of the Messenger Itself . . . . . 71
    - 7.5.7 Chemical Messengers Act Independently of One Another . . . . . 72
    - 7.5.8 Responses to Messengers Are *All-Or-None* . . . . . 72
    - 7.5.9 The Nervous System and the Endocrine System Operate in Fundamentally Different Ways . . . . . 72
  - 7.6 Summing up: *Cell–Cell Communication* . . . . . 73
  - References . . . . . 73

**Part III Implementing the New Paradigm for Teaching Physiology**

- 8 Organizing an Introductory Physiology Course Based on Core Concepts . . . . . 77**
  - 8.1 Organizing an Introductory Physiology Course . . . . . 77
  - 8.2 Introducing the Core Concepts of Physiology . . . . . 78
    - 8.2.1 Introduce the Core Concepts at the Beginning of the Course . . . . . 78
    - 8.2.2 Introduce the Core Concepts as the Students First Encounter Them . . . . . 79

8.3	Revisiting the Core Concepts Wherever They Apply to a Physiology Topic . . . . .	79
8.3.1	Consistent Terminology . . . . .	79
8.3.2	Consistent Visual Representations . . . . .	80
8.3.3	Requiring the Students to Actively Recognize Where the Core Concepts Apply . . . . .	80
8.3.4	Requiring Students to Use the Core Concepts . . . . .	81
8.4	Aligning Your Learning Outcomes and Learning Objectives with the Focus on Core Concepts . . . . .	81
8.5	Assessing Student Mastery of the Core Concepts . . . . .	81
8.6	The Long-Term Goal . . . . .	81
8.7	How to Do It All in the Available Time and with the Existing Constraints? . . . . .	82
	References . . . . .	82
<b>9</b>	<b>Teaching Physiology Using the New Paradigm: Three Examples . . .</b>	<b>85</b>
9.1	The Foundations of Our Approach to Teaching . . . . .	85
9.1.1	Meaningful Learning . . . . .	86
9.1.2	Active Learning: Build–Test–Refine Mental Models . . .	86
9.1.3	Learning Outcomes for this Topic . . . . .	86
9.1.4	Learning Environments . . . . .	87
9.2	Teaching Short-Term Regulation of Blood Pressure . . . . .	88
9.2.1	Context Within the CV Block and the Course . . . . .	88
9.2.2	The Content of This Topic . . . . .	88
9.2.3	Learning Outcomes and Learning Objectives for This Topic . . . . .	91
9.2.4	Assessing Student Mastery of the Regulation of Blood Pressure . . . . .	92
9.2.5	How We Might Help Students Master This Topic . . .	92
9.3	Teaching Respiratory Mechanics: Generating a Tidal Volume . . .	94
9.3.1	Context Within the Respiratory Block . . . . .	95
9.3.2	Content of this Topic . . . . .	96
9.3.3	Learning Outcomes and Learning Objectives for This Topic . . . . .	96
9.3.4	Assessing the Outcome (Performance) Goals: Generating a Tidal Volume . . . . .	96
9.3.5	How We Might Help Students Master This Topic . . .	97
9.4	Teaching the Hypothalamic–Anterior Pituitary Hormones and Their Control . . . . .	101
9.4.1	Context Within Course . . . . .	101
9.4.2	Content of Topic . . . . .	101
9.4.3	Learning Outcomes and Performance Outcomes for This Topic . . . . .	102
9.4.4	Assessment . . . . .	102
9.4.5	How Might We Help Students Master This Topic? . . .	104
9.5	How to Use These Examples . . . . .	105
	References . . . . .	106

<b>10 Using Core Concepts of Physiology in Designing Learning Resources</b> . . . . .	107
10.1 What Do We Mean by Learning Resources? . . . . .	107
10.2 Principles Guiding Development of Learning Resources . . . . .	108
10.2.1 The Student Is Responsible for His or Her Own Learning . . . . .	108
10.2.2 The Learning Resource Should Support Meaningful Learning, an Active Process . . . . .	109
10.2.3 The Learning Resource Should Help Students Recognize Their Current Mental Models . . . . .	109
10.2.4 The Learning Resource Should Help Students Test Their Current Mental Models . . . . .	109
10.2.5 The Learning Resource Should Guide Students in Revising Their Current Mental Models . . . . .	109
10.3 Incorporating Core Concepts in Your Learning Resources . . . . .	110
10.4 Learning Resources for Introducing Core Concepts . . . . .	110
10.4.1 Introducing Students to the Core Concept of <i>Homeostasis</i> . . . . .	110
10.4.2 Introducing Students to the Core Concept <i>Flow Down Gradients</i> . . . . .	111
10.4.3 Introducing Students to the Core Concept of <i>Mass Balance</i> . . . . .	111
10.5 Learning Resources to Help Students Master Physiology . . . . .	111
10.5.1 Temperature Regulation as an Example of <i>Homeostasis</i> . . . . .	112
10.5.2 The Action Potential and <i>Flow Down Gradients</i> . . . . .	112
10.5.3 Three Examples of the Application of <i>Mass Balance</i> to Important Physiological Phenomena . . . . .	112
10.6 Creating Online Resources . . . . .	113
10.6.1 An Interactive Tutorial . . . . .	114
10.6.2 A Qualitative Simulation . . . . .	115
10.7 Textbooks and the Focus on Core Concepts . . . . .	116
10.7.1 Challenges Posed by Textbooks . . . . .	116
10.7.2 How to Use Current Textbooks to Help Your Students . . . . .	117
10.7.3 Textbooks Which Have Attempted to Incorporate Core Concepts . . . . .	117
10.7.4 How to Incorporate Core Concepts in Physiology Textbooks . . . . .	118
10.8 Scaffolding Conceptual Learning with Appropriate Learning Resources . . . . .	119
